

Wyoming Frontier Information (WYFI) Newsletter February 2024

Community Health Record (CHR) Admin News

Just a reminder to the User Administrators that you cannot extend the expiration date for any users beyond the 90-day timeframe. Within the CHR, in the user maintenance screen under edit user settings, you will see the effective date and expiration date in the authentication section. The expiration date is what must stay within the 90-day timeframe. This prompts the user to change their password every 90 days. Please refer to the WYFI policy and procedures manual for additional details.

Each Participant or Authorized User is responsible for ensuring that they have the requisite, appropriate, and necessary internal policies for compliance with applicable laws and regulations and comply with WYFI policies. In the event of a conflict between WYFI policies and a Participant or Authorized User's policies and procedures, the Participant or Authorized User shall comply with the policy that is more protective of individual privacy and security.

To ensure the Participant or Authorized User complies with WYFI policies, WYFI may periodically require Participants to provide information regarding the Participant's policies, procedures, Authorized Users, or work environments for audit or review purposes.

Please ensure all users within your organization comply with the 90-day password expiration requirement and follow all WYFI policies and procedures for users.

WYFI Upgrade Progress

The KPI Ninja Universe upgrade is moving along. Testing with Rhapsody's Enterprise Master Patient Index (EMPI) system will take place in the coming weeks. This part of the upgrade will provide improved patient-matching data. WYFI expects to see improved patient data by linking records across systems, providing better matching and improved records

within the CHR.

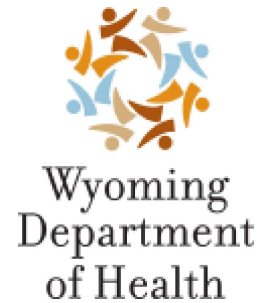

As we make significant upgrade progress, we will provide more updated information within the newsletter.

WYFI Stats

Patient Encounters	WY Covered Lives	CHR Users
9,500,941	608,423	5,119
