

Wyoming Frontier Information (WYFI) Newsletter

August 2024

KPI Ninja Upgrade

We anticipate going live with our KPI Universe upgrade in late September. The WYFI team will be sending out Google Meets User Training invites within the next few weeks. The training sessions will be offered multiple times before we go live with the upgrade. WYFI participants are encouraged to attend one of the sessions offered. Please watch for emails and invites related to the training sessions.

The current Community Health Record (CHR) site will be disabled on the go live date and will redirect users to the new Patient Comprehend (PC) site. Username's and passwords will remain the same. WYFI participants should remove the old URL and replace it with the new URL once we have disabled the CHR site.

WYFI Solutions Website

Just a reminder that the Wyoming Frontier Information (WYFI) has a website that can help you learn more about what WYFI is all about. You can view the mission and vision, use cases, and other resources. You can also see which providers are participating with WYFI and if they are contributing data or if they have view only access.

There are tutorials on the services offered. Each of our services are designed to empower healthcare providers with the tools they need to maximize the quality and management of care they deliver to patients. Our monthly newsletters are accessible through the website and if you need to contact us you can also do that through the website.

As we transition to the new KPI Ninja Universe Platform, we will be updating the website to reflect the new Patient Comprehend and other areas of the system.
